# Hazardous Weather

# Hazardous Weather

Later this afternoon, storms may form along the dryline and a few storms could be severe, depending on where the dryline sets up. Damaging winds will be the main threat with severe storms.

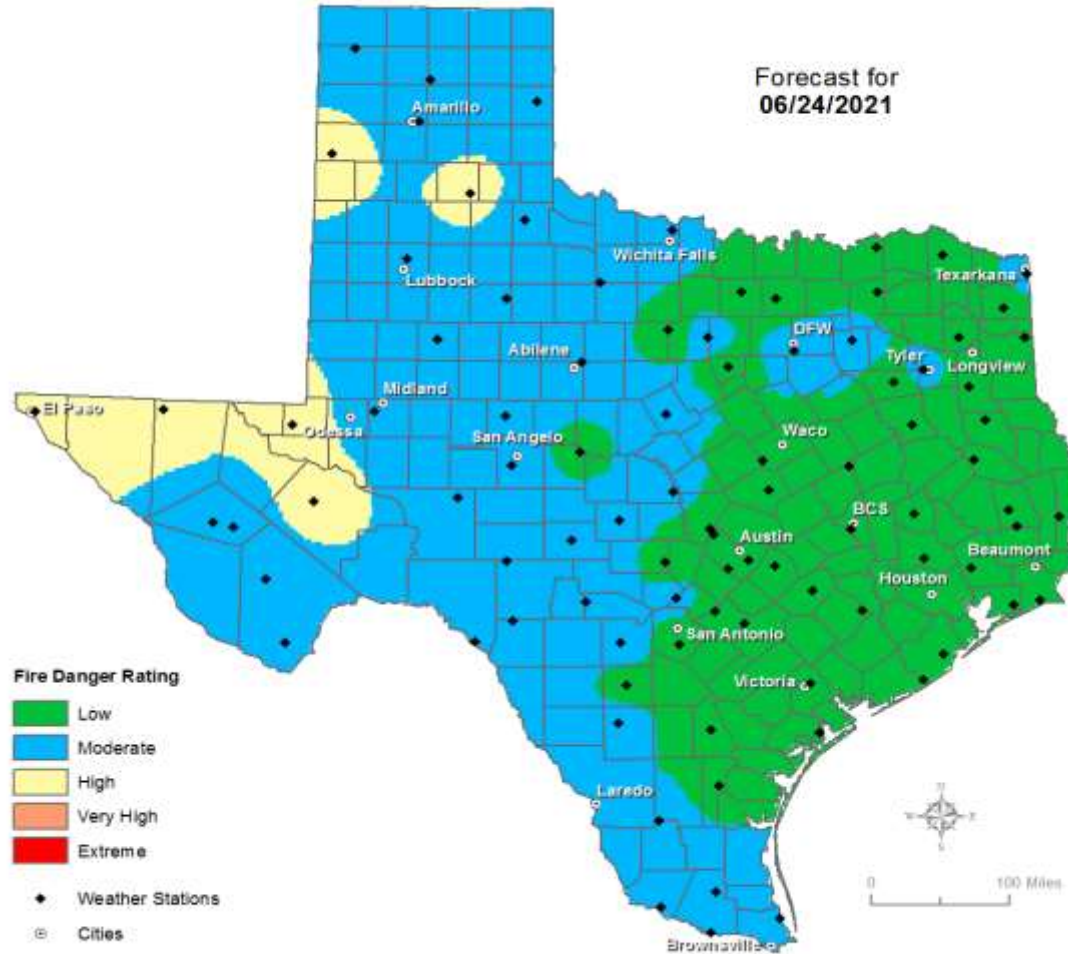

There is a High Risk for Rip Currents through early Friday morning. Conditions will be hazardous to anyone entering the surf zone. Remember to swim near a lifeguard and to stay in water knee deep or less. If you are caught in a rip current, yell for help and don't exhaust yourself while staying afloat waiting for help. If possible, swim parallel to the shore to escape the current and then swim back towards the beach.

County burn ban orders are established by county judges and/or county commissioners' courts. Texas A&M Forest Service is not responsible for establishing or removing burning bans. Texas A&M Forest Service is updating and displaying this information daily as a public service.

For more information please contact your local county judge's office or county website.
